

## **CapitalVision® Project Profile**

*Lee County Port Authority*

### **Southwest Florida International Airport Page Field General Aviation Airport**

***Client Profile:***

The Lee County Port Authority (LCPA) operates both Southwest Florida International Airport and Page Field General Aviation Airport in Fort Myers, Florida. Southwest Florida International Airport (RSW) ranks among the top five busiest airports in Florida in terms of passenger enplanements. Page Field (FMY) is ranked among the top five general aviation airports in the state in terms of the number of based aircraft. Both airports serve a strong business and tourism market and continue to see growth in passengers and aircraft operations.

***Project Description:***

LCPA is responsible for developing an annual capital improvement program (CIP) for maintenance and development of the Southwest Florida International Airport and Page Field. In 2008, LCPA implemented CapitalVision®, as a software as a service (SaaS) solution. Currently, LCPA is using CapitalVision® to track over 15 active capital projects with a total budget of over \$30 million. Projects range from the initial design and construction of a new parallel runway to upgrading an existing CCTV system.

Upon implementation of CapitalVision®, LCPA senior management recognized the immediate benefits of the solution as a more efficient way to manage the overall capital program and projects. The centralization of all capital project data is now available to every user, from Finance and Development to the Executive Director. This allows for immediate access to the CIP information eliminating the need to contact the “owner” of the spreadsheet, for example, to obtain the total amount of change orders to date on a contract. This information, and other important data such as fund balance, commitment of funds, and how funds were used – down to the invoice level – is now easily recorded and tracked by in CapitalVision®.

The LCPA Finance team enjoys the ease in tracking finances compared to the budget, and the Development team is able to track the detailed contract tasks for small and large projects. CapitalVision® provides the flexibility for the each user’s desired level of summary or detailed information.

Recently, LCPA was able to use CapitalVision® reports to satisfy auditors from the FAA on the use of Airport Improvement Program (AIP) funds.
